AMENDMENT

A Final Office action was mailed on 6/6/02. Applicant filed a response, by facsimile, on 9/27/02, enclosing the requisite petition for extension of time. Almost immediately it was discovered that due to a transmission error three pages were not transmitted. Those pages were transmitted through a separate facsimile transmission less than half an hour later. On February 10, 2003 it was discovered that the transmission to the PTO was misplaced within the PTO, or otherwise mishandled in the PTO. By that time the six month period has tolled and the case became abandoned. A petition was filed under 37 CFR 1.137(a) and under 37 CFR 1.137(b). The former was denied on June 23, 2004, and the latter was granted on June 28, 2004. The granting of the petition under 37 CFR 1.137(b) was accompanied with a two month period to continue prosecution, such as by filing an Appeal Brief. A conversation with John K. Gillon, Jr, the PTO attorney in this matter confirmed that filing an RCE is acceptable.

This amendment is offered with the filing of a Continued Prosecution Application, as required by the Rules.
